INDIVIDUALS WHO ARE IDENTIFIED AS CLOSE CONTACTS OF A COVID-19-POSITIVE INDIVIDUAL

1. You will be contacted by a member of the Columbia Contact Tracing Program and advised to quarantine for 10 days after your last exposure. Please refer to the quarantine guide for additional information.

You will not be told who you were exposed to, in order to protect their privacy.

2. Update your attestation on the ReOpenCU app.

3. Begin quarantine immediately. If you are home, stay home. If you are out in public or are on campus, collect your things immediately and go home.

Please monitor your symptoms daily during this 10 day period, including checking your temperature twice daily and watching for other COVID-19 symptoms such as cough or shortness of breath. You will continue to receive support and follow up from the university throughout this time.

If you develop symptoms during your quarantine period, you should IMMEDIATELY call your primary care provider (staff) or your campus health service (students) and continue staying home. Please refer to the isolation guide for additional information.

1. If you have no symptoms on the day after the 10 day quarantine period, you can end your quarantine. Monitor your symptoms daily until day 14 and continue following essential prevention measures.

2. If you have additional questions or concerns, please email covidtesttrace@columbia.edu.
